

High Definition Plasma Cutting

With an over-sized table, the ALLtra cutting system allows for high definition plasma and the more conventional torch cutting. Laser referencing enables profiles and bevels to be cut to tight tolerances. Nesting of parts minimizes scrap. Ten ton magnetic cranes transport steel plate, making the largest jobs possible.

Processing Capabilities

Angle, Beam, Channel,
Plate, Rectangular Tube,
Square Tube, Sheet, Tee

15" Clearance
Up to 56' Length
Up to 45° Bevel

3" Plasma Maximum Plate Cutting Thickness
6" Oxy Fuel Maximum Plate Cutting Thickness
